DK JEWELLERS

Master Website Requirement & UI/UX Design Document

Project Name: DK Jewellers Website
Project Type: Jewellery Brand Website
Brand Logo: DKJ
Brand Name: DK Jewellers
Development Technologies: HTML5, CSS3 and basic JavaScript where required
Design Reference: Approved DK Jewellers Website Wireframe

---

1. PROJECT OVERVIEW

1.1 Project Objective

The objective is to develop a professional, elegant and responsive jewellery website for DK Jewellers. The website will showcase gold and silver jewellery collections, introduce the brand, communicate its values and provide contact information for customers.

The design will combine traditional Indian jewellery aesthetics with a modern, premium e-commerce interface.

1.2 Target Audience

- Customers interested in gold jewellery.
- Customers interested in silver jewellery.
- Customers looking for traditional and bridal jewellery.
- Customers exploring jewellery designs for everyday wear and special occasions.

1.3 Project Scope

The website will include four main pages:

1. Home Page
2. Product Page
3. About Us Page
4. Contact Page

A consistent header, navigation bar and professional footer will be maintained throughout the website.

---

2. BRAND IDENTITY

2.1 Brand Name and Logo

- Official Brand Name: DK Jewellers
- Logo Monogram: DKJ simple logo
- Brand Style: Premium, traditional, elegant and trustworthy.

2.2 Brand Tagline

“Purity You Can Trust, Elegance You Can Wear.”

Alternative supporting tagline:

“Where Purity Meets Timeless Elegance.”

2.3 Brand Description

DK Jewellers presents jewellery inspired by timeless elegance, traditional designs and fine craftsmanship. The website aims to provide customers with an attractive browsing experience while communicating the brand's commitment to quality and customer trust.

---

3. UI/UX DESIGN GUIDELINES

3.1 Colour Palette

Design Element	Colour	Hex Code
Primary colour	Dark Maroon	#5A0715
Accent colour	Gold	#D4AF37
Secondary accent	Emerald Green	#176B4D
Main background	Cream	#F8F3EA

Main text	Dark Brown	#2B1A16
Product cards	White	#FFFFFF

Website element	Font styling
DKJ Logo	Bodoni Moda, bold
Brand name — DK Jewellers	Playfair Display, bold
Main headings	Playfair Display, bold
Section headings	Playfair Display, semi-bold
Paragraphs	Poppins, regular
Navigation menu	Poppins, medium
Buttons	Poppins, semi-bold
Footer text	Poppins, regular
Promotional banner	Playfair Display, bold

3.2 Typography

- Main headings: Bodoni Moda or Playfair Display.
- Body text: Poppins.
- Buttons: Poppins Medium.
- Logo letters: Bodoni Moda or a similar luxury serif font.

3.3 Design Principles

- Use cream backgrounds for clean content sections.
- Use maroon for the header, footer and important buttons.
- Use gold for decorative lines, icons and highlights.
- Use green sparingly for small decorative accents.
- Use high-quality jewellery images.
- Maintain consistent spacing and alignment.
- Use subtle hover effects and animations.
- Keep the design uncluttered and premium.
- Make the layout responsive on desktop, tablet and mobile.

---

4. COMMON HEADER AND NAVIGATION

The same header design will appear on all four pages.

4.1 Announcement Bar

A slim announcement bar will appear at the top of the website.

Suggested text:

“Discover Timeless Jewellery | Elegance in Every Detail”

Only advertise offers, discounts or delivery benefits that the business actually provides.

4.2 Navigation Bar

The navigation bar will contain:

- DKJ logo
- DK Jewellers brand name
- Home
- About
- Product
- Contact

Each navigation item must open the corresponding page.

The logo should link to the Home Page.

---

5. HOME PAGE REQUIREMENTS

Page File: index.html

The Home Page will introduce DK Jewellers and showcase selected jewellery collections.

5.1 Hero / Trust Section

Main heading:

“Crafted with Purity, Delivered with Trust.”

Supporting text:

“Explore timeless jewellery designs inspired by elegance and tradition.”

Required elements:

- Main heading.
- Short supporting description.
- Jewellery image or visual card.
- Explore Collection button linking to the Product Page.

5.2 Promotional Banner Slider

A wide banner will appear below the introductory section.

Required elements:

- Large jewellery image.
- Promotional heading.
- Short supporting text.
- Optional call-to-action button.
- Multiple slides.
- Automatic slide movement.

Use basic JavaScript if required for automatic sliding.

5.3 Silver Jewellery Collections

Create three separate collection sliders:

Collection A: Silver Rings

- Display silver ring images.
- Show product names.
- Display prices if available.

Collection B: Silver Anklets

- Display silver anklet images.
- Show product names.
- Display prices if available.

Collection C: Other Silver Products

- Display additional silver jewellery items.
- Show product names and available details.

5.4 Gold Jewellery Collections

Create three separate collection sliders:

Collection D: Gold Rings and Chains

- Display gold rings and chain images.
- Show product names and available prices.

Collection E: Gold Necklaces

- Display gold necklace images.
- Show product names and available prices.

Collection F: Other Gold Products

- Display other gold jewellery designs.
- Show product names and available prices.

5.5 Product Card Design

Each product card should include:

- Jewellery image.
- Product name.
- Price, if available.
- View Details or Explore Collection link.

Use consistent image dimensions and subtle hover effects.

5.6 Home Page Footer

The Home Page must end with a professional footer, as specified in Section 9.

---

6. PRODUCT PAGE REQUIREMENTS

Page File: product.html

6.1 Page Heading

“Our Jewellery Collection”

Supporting text:

“Discover jewellery for every style and occasion.”

6.2 Jewellery Categories

The Product Page will contain the following eleven categories:

1. Earrings
2. Bangles
3. Necklace
4. Bracelets
5. Nath
6. Ring
7. Bridal Collection
8. Anklet
9. Maang Tikka
10. Chain
11. Other

6.3 Category Layout

- Display the jewellery categories clearly.
- Use a category list or category navigation area.
- Display jewellery products in a responsive grid.
- Use product images with consistent proportions.
- Add product names.
- Display prices only when actual prices are available.
- Include a View Details link or button.
- Use subtle hover effects.

For the initial version, all categories may be displayed on one page. Separate category pages are not required.

A category filter may be added as an optional enhancement.

6.4 Product Information

Where available, each product can include:

- Product name.
- Category.
- Image.
- Price.
- Material or metal type.
- Weight and purity, if verified.
- Product description.

Do not publish invented prices, weights, purity details or certification claims as actual product information.

---

7. ABOUT US PAGE REQUIREMENTS

Page File: about.html

7.1 Page Introduction

Main heading:

“About DK Jewellers”

Tagline:

“Where Purity Meets Timeless Elegance.”

Suggested introductory paragraph:

“DK Jewellers celebrates the beauty of jewellery through elegant designs, traditional inspiration and attention to craftsmanship. Our aim is to make every jewellery selection a memorable experience for our customers.”

7.2 Jewellery Image Section

- Display a large, high-quality jewellery image.
- Use a balanced image-and-text layout.

- Apply a subtle fade-in or hover animation if suitable.

7.3 Our Promise Section

Create three content cards.

Purity and Quality

A commitment to quality and transparent product information.

Honest Service

Clear communication and customer-focused service.

Fine Craftsmanship

Attention to jewellery design, detail and finishing.

7.4 Why Choose DK Jewellers?

Display the following five points:

- Quality.
- Transparency.
- Purity.
- Customer Trust.
- Elegant Designs.

Use simple icons or small decorative elements.

7.5 Supporting Image

Add a supporting jewellery image to complement the content and maintain the premium brand identity.

7.6 Footer

Use the same professional footer as the Home Page.

Important: Any claim about hallmarking, certification or guaranteed purity must be supported by the actual business credentials and products.

---

8. CONTACT PAGE REQUIREMENTS

Page File: contact.html

8.1 Page Layout

- Common announcement bar.
- Common navigation bar.
- Contact page heading.
- Short introductory text.
- Centred contact form.
- Professional footer.

8.2 Contact Form Fields

The form will contain these five fields:

1. Name.
2. Address.
3. Phone Number.
4. Email.
5. Something About — message field.

8.3 Submit Button

Include a clearly visible Submit button using the maroon and gold brand palette.

8.4 Form Requirements

- Use visible labels.
- Mark essential fields as required.
- Use suitable input types.
- Apply basic browser validation.
- Keep the form aligned and responsive.

The initial version will provide the form interface. Actual message delivery requires a backend or form service.

8.5 Contact Details

If actual business details are available, display the official phone number and email address. Do not publish invented contact information.

---

9. PROFESSIONAL FOOTER REQUIREMENTS

Placement: At the bottom of the Home, Product, About Us and Contact pages.

The footer will use a professional, uncluttered layout with three columns on desktop and vertically stacked sections on mobile.

9.1 Column One — Brand Identity

Include:

- DKJ logo.
- Brand name: DK Jewellers.
- Tagline: “Purity You Can Trust, Elegance You Can Wear.”
- Short brand description.

Suggested content:

“Welcome to DK Jewellers, where timeless elegance meets traditional craftsmanship. Discover jewellery designed to celebrate your special moments with beauty, grace and trust.”

9.2 Column Two — Quick Links

Include the following links:

- Home.
- About Us.
- Product Collection.
- Contact Us.

Each link should open the correct page.

9.3 Column Three — Contact Information

Include:

- Phone Number: Actual business contact number.
- Email: Official business email, if available.
- Contact Us link.

The phone number should be clickable so that mobile users can call directly.

Do not display placeholder phone numbers on the live website.

9.4 Footer Styling

- Background: Dark Maroon (#5A0715).
- Main text: Cream (#F8F3EA).
- Decorative lines and icons: Gold (#D4AF37).
- Small decorative accents: Emerald Green (#176B4D).

Maintain readable text, consistent spacing and balanced alignment.

9.5 Copyright Bar

Place a thin gold divider above the copyright text.

Suggested text:

“© 2026 DK Jewellers. All rights reserved.”

The copyright year can be updated when required.

---

10. IMAGES AND CONTENT REQUIREMENTS

The following assets will be required:

- DKJ logo.
- Home Page hero image.
- Promotional banner images.
- Silver ring images.
- Silver anklet images.
- Other silver jewellery images.
- Gold ring images.
- Gold necklace images.
- Other gold jewellery images.
- Images for the eleven Product Page categories.
- About Us jewellery image.
- Icons for promise and trust sections.

All images should be high quality, appropriately sized and visually consistent with the brand.

Use actual business photographs where available. Otherwise, use suitable licensed or permitted jewellery images.

---

11. TECHNICAL REQUIREMENTS

11.1 HTML

HTML will be used to structure:

- Header and navigation.
- Banner sections.
- Product sliders and cards.
- Jewellery categories.
- About Us content.
- Contact form.
- Footer.

Use semantic HTML elements, descriptive image alt text and meaningful page titles.

11.2 CSS

CSS will be used for:

- Colour palette.
- Typography.
- Page layouts.
- Product grids.
- Sliders' visual presentation.
- Buttons and cards.
- Hover effects.
- Animations.
- Responsive design.

11.3 JavaScript

Basic JavaScript may be used where necessary for:

- Automatic promotional banner sliding.
- Interactive product category filtering, if implemented.
- Mobile navigation toggle, if required.

11.4 Initial Project Limitations

The initial project is a front-end website.

The following are outside the current scope:

- Customer login and registration.

- Database integration.
- Online payment gateway.
- Working shopping cart and checkout.
- Admin dashboard.
- Backend processing of contact messages.

These features can be considered in a later phase if required.

---

12. PROJECT FOLDER ORGANISATION

Create the following files and folders in VS Code:

Main Folder: DK-Jewellers

- index.html — Home Page.
- product.html — Product Page.
- about.html — About Us Page.
- contact.html — Contact Page.
- css/ — Main stylesheet.
- js/ — JavaScript interactions.
- images/ — Logo, banners and jewellery photographs.

Use one common stylesheet to maintain the same design across all pages.

---

13. DEVELOPMENT PLAN

Follow this order to develop the website:

Phase 1: Project Setup
Create the project folder and four HTML pages.

Phase 2: Common Layout
Build the announcement bar, navigation bar and professional footer.

Phase 3: Design System
Apply the brand colours, typography, spacing and common button styles.

Phase 4: Home Page
Build the introductory section, promotional banner and six jewellery collection sliders.

Phase 5: Product Page
Build the eleven jewellery categories and product grid.

Phase 6: About Us Page
Add the introduction, jewellery image, Our Promise and Why Choose DK Jewellers sections.

Phase 7: Contact Page
Build the five-field contact form and Submit button.

Phase 8: Interactions
Add the required slider functionality and basic visual effects.

Phase 9: Responsive Design
Adjust all four pages for mobile, tablet and desktop.

Phase 10: Final Testing
Check navigation, images, page layouts, responsiveness and form validation.

---

14. FINAL TESTING CHECKLIST

Before considering the website complete, verify the following:

- All four pages open correctly.
- The DKJ logo displays properly.
- The brand name consistently appears as DK Jewellers.
- Navigation links work correctly.
- The announcement bar is consistent.
- The Home Page banner slider works as intended.
- All six Home Page jewellery collections are present.
- All eleven Product Page categories are included.
- Product images and names are aligned.
- About Us sections match the approved wireframe.
- Contact form fields and Submit button are visible.
- Footer contains the logo, tagline, short description, contact details and quick links.
- Phone number and contact links work where configured.
- The layout works on desktop and mobile.
- There are no broken image paths or page links.
- No unverified business claims or placeholder contact details appear on the live website.

---

15. EXPECTED FINAL OUTCOME

The completed DK Jewellers website will be a professional, responsive and visually consistent jewellery website that follows the approved wireframe.

It will include:

- A consistent brand identity using the DKJ logo.
- A Home Page featuring promotional banners and gold and silver jewellery collections.
- A Product Page with eleven jewellery categories.
- An About Us Page communicating brand values and craftsmanship.
- A Contact Page with the required contact form fields.
- A professional footer containing the logo, tagline, short brand description, contact information and navigation links.

The final design will maintain a premium Indian jewellery aesthetic through its maroon, gold, cream and emerald-green palette.

The project will focus on completing the four-page front-end website first, without adding unnecessary features outside the approved wireframe.
